WGRC Quarterly Meeting
10/3/26

Rob B. – president, Rich L. - vice president, Mark S. - secretary in attendance
Dave – treasurer unavailable

Welcome new member Steve Kellet

Treasurer update:
Combined gift to club from former member, including second round residual of $28k, paid out total of $90,163.94 including interest earned. This has been deposited in CD at same interest rate as previous CD. $5,175.12 in checking and $3,797.18 in operating account. Financially sound and operating under budget. Property owner gift we have not used last few years are there other ways to recognize?

Membership renewal:
Document and verify PayPal experience prior to renewal season. Confirm payment from new member.
Shift membership timing from December to March – see link to Google poll to vote on this measure.

Field report:
Field wet lately but very flyable, one end a little wet with taller grass. Property owner has mowed section of field and president is working to get more of the outfield mowed. Explore using annual gift use as an incentive to motivate employee who manages field? New charging station batteries installed and functioning correctly.

2027 explore new blades for mower and if cut is better without mulch plug.

Officer elections: if any member wants to run for any position please contact secretary. Elections will be held if any club member wants to run for office.

Other:
Buc-Lee has experience substantial increase in cost to lease field. They are developing a committee to explore finding a new flying site. Does anyone from WGRC want to join this committee to give us some insight and voice?

Explore an app like Whatsapp or GroupMe to let other members know who is flying versus using text chain. Testing options with small group will announce in spring.

President asking for member to manage website calendar, notes updates.

Dick W. presented information on how club members with 3D printers can help printing parts for children with mobility problems. Full details at 3D-Mobility.org.

Members can join and work independently or as a team to provide parts to help others. Very interesting cause please check out the link and contact Dick with questions.
